

Banishing Data Chaos with Trango and OpenSpirit

Leonard Hendricks & Amy Iverson
Fugro Data Solutions
OpenSpirit Technical Symposium
Houston – September 2010

Data is core to Fugro

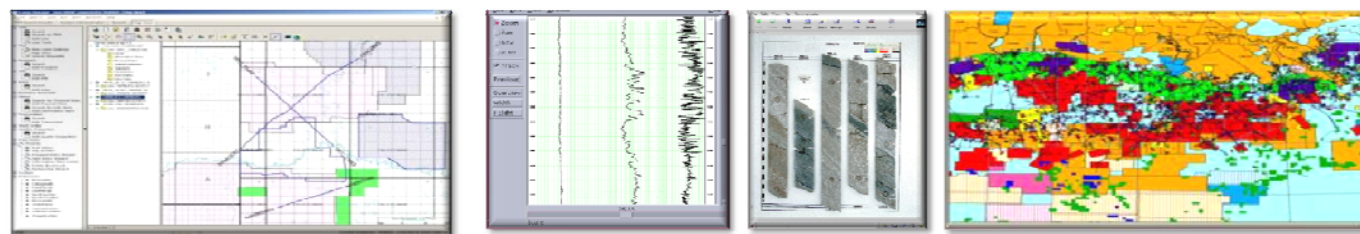

**Fugro generates
your data**

**Fugro manages
your data**

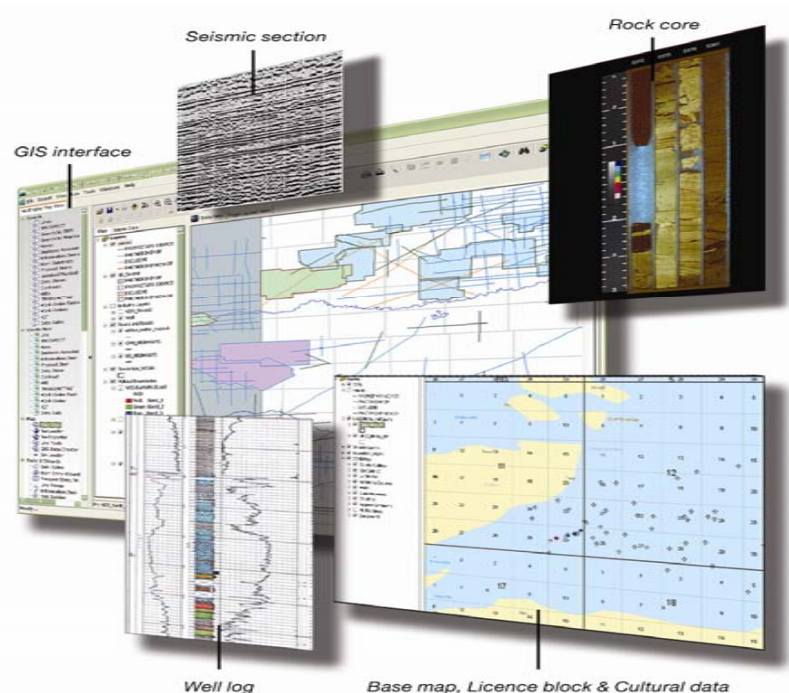

- Fugro is a leader in analyzing, managing, storing and providing access to Oil and Gas exploration data.
- With over 13,000 employees worldwide, you can count on Fugro for long term global support
- Fugro helps to improve efficiency by providing secure storage facilities, ISO 9001 certified processes and software, and quick access to the right data in a HSE certified environment.

**Fugro enables use of and manages the lifecycle of your
data**

Trango

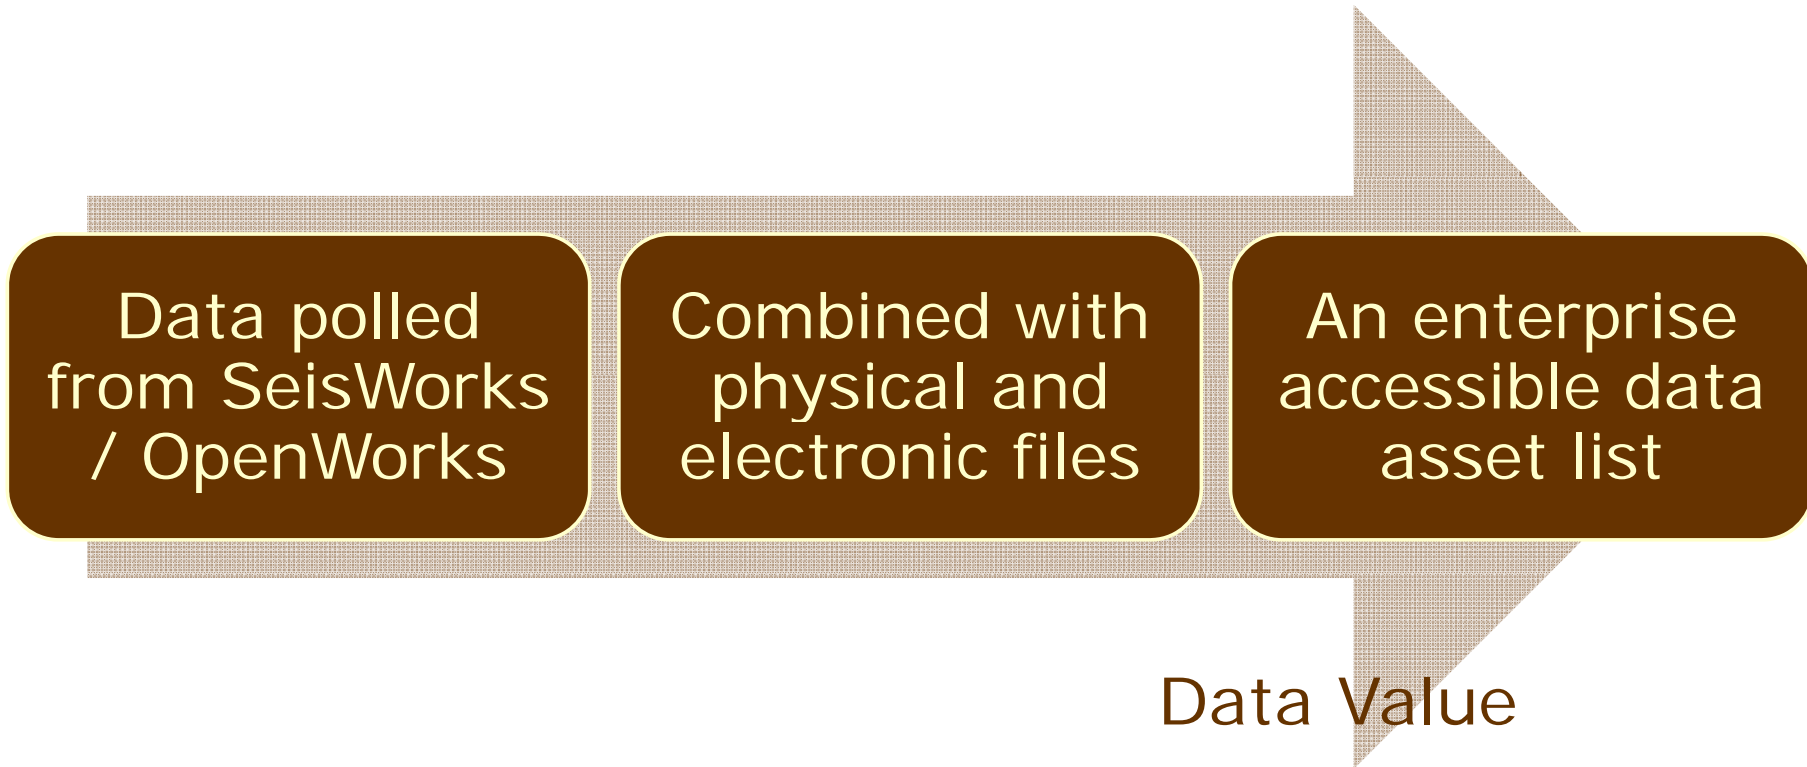

- Efficient and easy system to access petro-technical data
- Access higher quality information from anywhere to make decisions quickly
- Maximize control with a single master data repository, regardless of data location
- Streamline workflows and reduce cycle times
- Manages full data lifecycle

End-User Business Challenge(s)

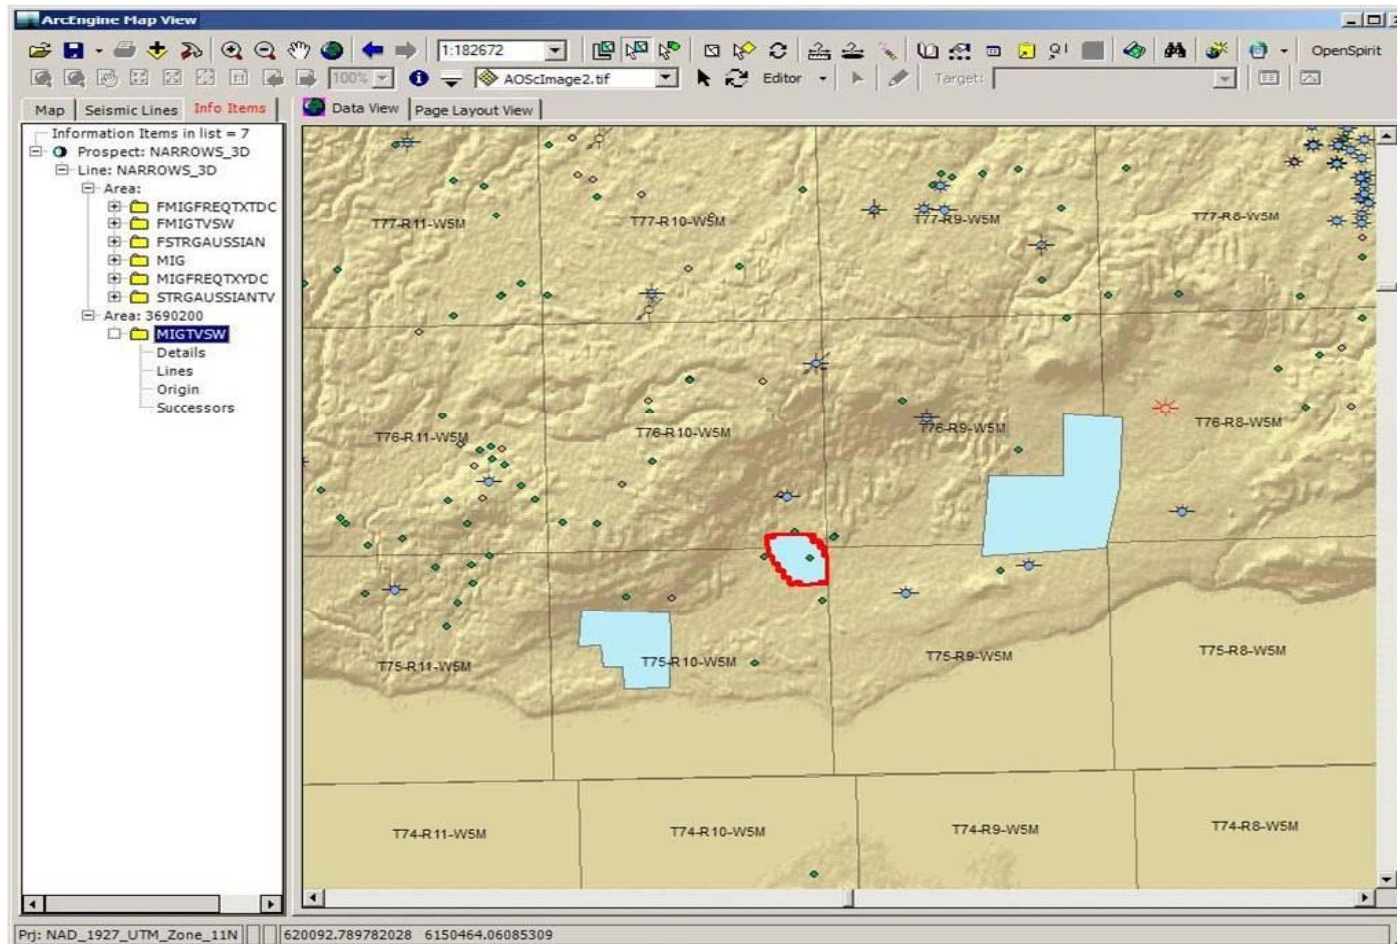

- Shoehorning data management into Interpretation systems
- Inability to easily show a comprehensive asset list
- Difficulty in acquisitions and divestitures
- Unknown lineage resulting in lost opportunities to leverage rework
- Cumbersome data indexing, storage and retrieval, and archival workflows

Business Challenge Solution

Client Results

October 11, 2010

Workflow Demo

Solution Benefits

- Knowledge of projects underway and data being used
- Ability for all of the company to utilize assets
- Linkages between various processed versions of data
- Navigation captured, stored and accessible to other applications
- Additional information and items added easily
- Confidence in which data to archive, and availability once archived
- Ability to fill in the gaps of data owned, but not in processing systems, and visa-versa

Summary

- Unmanaged data assets
- Utilizing OpenSpirit-enabled creation of master data list with minimal effort
- Dataset can be easily leveraged further within the company
- Confidence in workflow capabilities and efficiency
