

## Oil company averages 89% workflow efficiency improvement using OpenSpirit

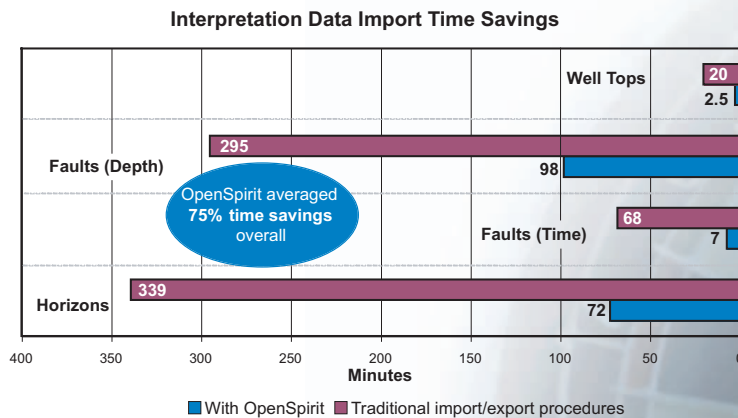

### Why OpenSpirit should be part of your long-term data management strategy

Speed counts, but only if it has a positive impact on your business. OpenSpirit provides dramatic workflow efficiency improvements, and since 2000, clients have been telling us that they are seeing improved productivity, better decision making and lower costs by using OpenSpirit to integrate their applications and data stores.

Using OpenSpirit, an oil company improved import time for 2D seismic data by 97% and 3D seismic by 98%.

the flexibility and power to create, read, update and delete data from anywhere your network without compromising quality. Around the world, asset teams are shortening the time between data loading and data analysis by using OpenSpirit to move data between their applications and data stores.

Getting down to the business of analysis and interpretation is what it's all about, and this client imported multiple data items in 75% less time using OpenSpirit.

*Infinite  
Integration*

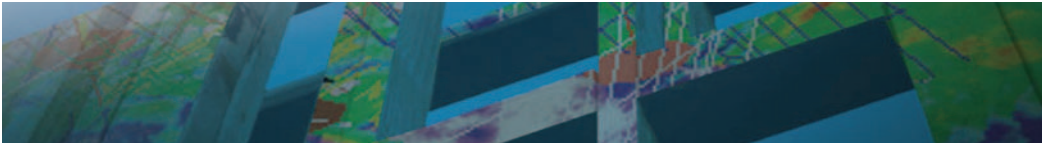

*Having confidence in your data integrity makes the added benefit of high-performance data management workflows that much sweeter.*

Recently, an oil company client shared statistics showing a **50% to 99% performance improvement** when using OpenSpirit to import seismic, interpretation and well data into their reservoir modeling solution vs. traditional import/export procedures.

### You CAN have speed and quality

Having confidence in your data integrity makes the added benefit of high-performance data management workflows that much sweeter.

OpenSpirit provides *infinite integration* – giving your applications and data stores

## Infinite Integration

### About OpenSpirit

The OpenSpirit Corporation, based near Houston in Stafford, Texas, began operations in July 2000 as an independent software company focused on providing integration solutions for upstream applications and data. The OpenSpirit application integration framework allows interoperability between multiple vendors' applications and data. To date, more than 40 software vendors have licensed the OpenSpirit developer's kit. Additionally, there are now more than 1500 oil company end users in more than 50 countries taking advantage of the framework to speed up critical workflows and enhance analysis in the geotechnical space, with more adopting the solution every day.

### Well Data Import Time Savings

Import well data for hundreds of wells and save up to 99% of your time with OpenSpirit.

End-user confidence is further enhanced when the world's leading upstream application and data store providers make such good use of the OpenSpirit Developer's Kit to ensure maximum efficiency for loading data into their products. OpenSpirit provides more than 40 plug-ins for applications from over 30 developers, as well as a dozen data stores, so chances are your applications and data stores are already OpenSpirit-enabled.

### More evidence of efficiency using OpenSpirit:

- Using OpenSpirit, a Canadian independent reduced data transfer time from **6+ hours to 30 seconds**.
- After spending **8 months** loading 16,000 deviation surveys into a modeling application, another independent oil company used OpenSpirit to load the same data into Petrel® in only **7 minutes**.
- Using OpenSpirit, another independent cites a typical reduction in data transfer time from **2 days to 1 minute** or less.

### The connections are already there and OpenSpirit is all you need for complete integration

Integration has never been easier – you're only one step away! You can enable the OpenSpirit functionality that's already embedded in your applications by simply calling OpenSpirit and purchasing the licenses you need.

OpenSpirit is your one-stop resource for a complete, integrated solution supporting not only the OpenSpirit family of products, but upstream applications and data stores from industry-leading E&P solution providers.

### Call for an evaluation today and chart your own numbers

You can have speed without sacrificing data integrity. OpenSpirit can be part of your long-term strategy to achieve data management efficiency. Try it in your shop and see what the numbers look like for you. Call today to request an evaluation! ♦
