

Infinite Integration

OpenSpirit v3.1 Highlights

May 2008 Webcast
Suri Bhat

OpenSpirit v3.1 Benefits

- New Data Connectors
 - OpenWorks R5000
 - GeoFrame 4.4
- Windows Vista Support
- New v3 developer kit
 - Standards based data access API (JDBC, ADO.NET)
 - New metamodel service
 - Expanded unit service
 - Expanded carto service
 - Native data model access to Finder, PPDM
- Significant performance increase for bulk data access (horizon, seismic, etc...)
- Recommended for streamlining future v3.x upgrades.

Demonstration

*Simultaneous access to data from
OpenWorks R2003 & OpenWorks R5000*

- SIS Certification for Petrel 2008.1 on v3.1
- Data Key migration utility for migrating v2x to v3x keys
 - Only needed for projects created with OpenSpirit v2x.
- Write-back of 2D interpretation data to the database when using OpenSpirit

Demonstration

Petrel 2008 Data Key Migration Utility

OpenSpirit v3 Benefits vs. v2.9

- Improved Installation of OpenSpirit
 - No Oracle required
 - Windows only deployment supported in addition to Solaris & Linux
 - New Admin Tools (User Manager, License Manager, Installation Manager)
 - New User Setup wizard
 - Default data server host, account, password options
 - New Session Wizard
 - Expanded unit service based on POSC/ISO
 - Expanded carto service based on EPSG & ESRI projection engine
- New user experience vastly simplified

Thank you!
